

Kalivody

Our second trip to nature brought us deep into autumn and Czech countryside around the small village of Kalivody, in Rakovník district, around 20min from Slaný by car

You'd better have a local to guide you - the path starts by turning left just before the last houses

Not far from the start is a natural source with drinkable water - tested and approved!

A bit further this kiosk is the starting point of several hiking paths - Let's go !!!

This photo is entitled
"we're lost !"

But we finally found our
way back to Kalivody

There, on the opposite
side, there is a nice lake

In winter the level of water
is quite low but it is still a
pretty sight

Over the lake is a swing, ideal for revealing your inner trapeze artist.

If you are lucky, you may spot a grey heron around the lake - even if these animals are usually shy

So don't hesitate to go discover this nice piece of nature !
